DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 54 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Stewart (5,949,892 from IDS).

Allowable Subject Matter

Claims 55-74 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 75-87 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: The structural limitations of the dependent claims 55-74 are not taught or fairly suggested by the prior art of record. The feedback limitations of claims 75-87 in combination with the micromachined membrane produce an invention not taught or fairly suggested by the prior art of record.
